Internship

MERN Stack Intern | Node.js, MongoDB, React, Express.js

Jan 2026- Feb 2026

[codTech IT solution.](#)

- Contributed to the development of multiple full-stack applications including a **Weather Application, Real-Time Collaboration Tool, and Real-Time Chat System** using the MERN stack.
- Built RESTful APIs with Express.js and designed MongoDB schemas for structured CRUD operations and data management.
- Integrated real-time communication using Socket.io and handled dynamic UI updates with React state management.
- Implemented server-side validation, middleware handling, and optimized API performance with proper error handling

React.js Intern | React, JavaScript, Tailwind

Sep 2025-Oct 2025

[Badkul Technology](#)

- Developed a Trip Management application using React with reusable components and dynamic state handling.
- Implemented CRUD functionality with Local Storage sync and responsive UI using Tailwind CSS.

Projects

Form Builder App | MERN Stack

Feb 2026

- Developed a dynamic form builder using MERN stack allowing users to create, edit, and manage custom forms with MongoDB-based data persistence.
- Implemented REST APIs for form creation, submission handling, and dynamic data storage with authentication and validation.
- Designed responsive UI with reusable React components and dynamic field rendering based on user configuration.
- Implemented pagination and protected routes to manage user-specific form data securely.

Real time collaboration tool | MERN Stack

Jan 2026

- Built a real-time collaboration platform using MERN and Socket.io enabling multiple users to edit and sync data simultaneously.
- Implemented WebSocket-based communication for instant updates without page refresh.
- Designed MongoDB schemas for structured data storage and implemented CRUD APIs using Express.js.
- Managed user sessions and handled concurrency issues to ensure consistent real-time data synchronization.

Certificates / Certifications

Cloud Computing

Oct 2024

NPTEL - [Certifications Link](#)

Web Development Bootcamp

Feb 2023

Udemy – [Certificate Link](#)

Skills

Languages C++, Java, JavaScript

Technologies/Frameworks: Git, GitHub, Tableau, Postman, Thunder Client, React JS, Node JS, Express JS

Database: MongoDB, SQL

Domain Skills: Data Structures and Algorithms, OOPs

Education

Lovely Professional University

2022 – 2026

Bachelor of Technology - Computer Science and Engineering — CGPA: 7.00

Phagwara, Punjab

S.B.R Collage

2021 – 2022

12th — 75%

Patna, Bihar

Ghyanasthali High School

2019 – 2020

10th — 76%

Patna, Bihar
